

Safe Access Solutions

Innovative Stainless Steel Products

Equipments in Stainless Steel

A comprehensive program of equipments in stainless steel for buildings related to water treatment

Huber SAS Products

- SS Manhole Covers
- Technical Doors
- Drinking Water Storage

HUBER stainless steel products are the best solution for drinking, municipal and industrial water and wastewater treatment applications. So, you should choose a material that satisfies the highest needs:

- Unrivalled lifespan
- Absolute corrosion resistance due to acid treatment in a pickling bath and passivation
- Standardized products provide safety for planning and cost advantages
- Hygienic conditions on the highest possible level provide safety for men and environment

Stainless Steel Manhole Covers

The complete equipment – Manhole covers

- Rectangular
- Round
- Weather-proof
- Attack-proof (certified)
- Flood-proof
- Backup-proof
- Pedestrian bearing

Fall protection:

- Antifall guard
- Railing for manhole opening

Universally retrofittable!

Climbing Systems

Security tested and design certified

- Access ladders
- Climbing devices
- Climbing systems with fall protection
- Entrance aids in accordance with DIN 19572

Technical Doors

Unauthorised access to free water surfaces in drinking water reservoirs, technically important stages in the wastewater treatment process, or other structures with increased security requirements must be prevented or eliminated.

- Attack-proof doors in accordance with DIN EN 1627, resistance class RC3 and RC4
- Double skinned doors, double or single doors
- Chlorine room doors
- Manholes
- Inspection holes
- Louvres
- Stainless steel windows

Such equipment increases the resistance time of structures and hinders unauthorised persons or casual offenders.

Pressure Doors

Pressure-tight up to a water gauge of 30 m. Due to their easy installation and a number of crucial benefits pressure doors are applied in

- Drinking water reservoirs
- Stormwater overflow tanks
- Locks
- Pump stations
- Inspection holes
- Pressurized drinking water treatment plants
- Flood protection

Pressure doors can easily be retrofitted to existing plants!

System Solution: Hygiene in Drinking Water Storage Tanks

Drinking water protection against germination and impairment

- Equipment components completely made of stainless steel and acid treated in a pickling bath
- Air filter plants for aeration of the drinking water storage tank
- Optimum flow in the drinking water storage tank
- Compliance with the relevant standards for planning reliability
- Keeping the regulations of safety at work, avoiding accidents

Railing Systems

We are manufacturing and supplying Stainless Steel Railings. These Stainless Steel Railings are constructed with high grade steel for the best quality and long life.
